🐸 PEPE WALL STREET 2.0 — OFFICIAL WHITEPAPER

Ticker: PEWS20
Blockchain: BNB Smart Chain
Standard: BEP-20
Official website: www.pews2.fun

---

1. Project overview

PEPE WALL STREET 2.0 was born after many investors got tired of:

• empty promises
• anonymous teams disappearing
• tokens with no real utility
• lack of transparency
• presales that never delivered tokens

Here, the proposal is simple and direct:

✓ full transparency
✓ contracts verified on-chain
✓ tokens delivered instantly after purchase
✓ liquidity being built already during presale
✓ strong focus on community
✓ initial targeting of the Asian market

PEWS20 combines:

• meme power
• solid technical structure
• automatic on-chain raffles
• investor-protection mechanisms
• future expansion to staking and multichain bridge

---

2. Project mission

Build a meme project that:

✓ is transparent
✓ has fully auditable contracts

✓ uses multisig wallets
✓ plans a 12-month liquidity lock at listing
✓ includes real team vesting

Without:

✕ unrealistic promises
✕ guaranteed profits
✕ “magic shortcuts”

---

3. Project security

🔒 Planned 12‑month liquidity lock

When initial liquidity is created at listing:

•The project plans to lock the initial liquidity for 12 months.
•The lock can be verified on BNB Smart Chain once executed.
•The public lock link will be shared once available.

Result:

🛡 protection against rugpulls
🛡 prevents sudden liquidity removal
🛡 increases market confidence

💧 Liquidity reserve during presale

Part of each presale purchase is directed to a dedicated liquidity wallet:

• dedicated wallet
• public
• fully traceable
• starts filling even before launch

Official LP wallet:

👉 **0x484e14e005FBa1C609b35163C2055345D40708c9**

---

4. Multisig on main wallets

Wallets secured by multiple signatures:

• owner multisig
• LP wallet
• team wallet

Benefits:

✓ no single person controls everything
✓ reduced human risk
✓ protection against device compromise
✓ transactions require multiple approvals

---

5. Team vesting

Team tokens:

• are locked
• unlocked gradually
• over 12 months

Result:

✓ long-term alignment
✓ protection against immediate dumping
✓ institutional-level credibility

---

6. Token fees

Buys: **0%**
Transfers: **0%**
Sells: **3% total**, distributed as:

• 1% liquidity
• 1% marketing
• 1% buyback

Fee applies only on sells
No fees on buys
Nothing hidden in the contract

---

7. Presale structure

✓ 20 automatic rounds
✓ Chainlink BNB/USD price feed
✓ automatic round switching
✓ no hidden admin panel
✓ no manual price control

A round advances when:

• the tokens allocated to that round are sold out

Tokens are sent **immediately** after purchase.

No waiting for presale to end.
No “manual claim” weeks later.

---

8. First 500 buyers benefit

Simple rule:

• first 500 buyers: no minimum purchase
• after 500 buyers: minimum purchase = 20 USD

Important notes:

✓ early buyers do not get lifetime privileges
✓ rule applies equally to everyone after 500
✓ this is not a pyramid system
✓ no referrals required

Everything is on-chain and public.

---

9. Automatic raffles

For every **200,000 USD raised**:

🎁 automatic raffle
🏆 1 winner receives 1 BNB
🔗 randomness powered by Chainlink VRF

Features:

✓ impossible to manipulate
✓ random number is public

10. Tokenomics

Total supply 1,000,000,000,000 PEWS20

Allocation	PEWS20	% of supply
Presale (20 rounds)	148,270,617,743	14.82706%
Launch liquidity	428,571,429	0.04286%
Future liquidity reserve	99,571,428,571	9.95714%
Marketing wallet	200,000,000,000	20.00000%
Deployer wallet	100,000,000,000	10.00000%
Team allocation (planned)	100,000,000,000	10.00000%
Exchange listings (CEX)	50,000,000,000	5.00000%
Community and ecosystem incentives	200,000,000,000	20.00000%
Development and operations treasury	100,000,000,000	10.00000%
Strategic reserve	1,729,382,257	0.17294%
Total supply	**1,000,000,000,000**	**100.00000%**

The marketing and deployer wallet amounts reflect allocations reported by the project. The planned team allocation is shown separately from the deployer wallet.

Planned opening price

US$ 0.007 per PEWS20

This is the planned opening price. The market price may change once trading begins.

11. Presale rounds

The 20 rounds start at US$ 0.00005 per token. The price increases by approximately 25% per round while the number of tokens offered decreases.

Round	Token price (USD)	PEWS20 offered
1	0.000050000	30,000,000,000
2	0.000062500	24,000,000,000
3	0.000078125	19,200,000,000
4	0.000097656	15,360,000,000
5	0.000122070	12,288,000,000
6	0.000152588	9,830,400,000
7	0.000190735	7,864,320,000
8	0.000238419	6,291,456,000
9	0.000298023	5,033,164,800
10	0.000372529	4,026,531,840
11	0.000465661	3,221,225,472
12	0.000582077	2,576,980,378
13	0.000727596	2,061,584,302
14	0.000909495	1,649,267,442
15	0.001136869	1,319,413,953
16	0.001421086	1,055,531,163
17	0.001776357	844,424,930
18	0.002220446	675,539,944
19	0.002775558	540,431,955
20	0.003469447	432,345,564

12. Presale pricing and market price

Earlier rounds have lower scheduled prices. The launch target appears in section 10. Market price and returns can vary.

13. Legal notice

PEWS20 is:

• a utility token
• a community-driven project
• not a guaranteed investment product

Crypto assets involve risks:

• price volatility
• market liquidity
• external factors

Always do your own research.
